OUR TREATMENTS

Enhancing your natural beauty

MEDICARE COSMETICS

dedicated to aesthetics

Why Medicare?

Our aim is to bring you the highest standard of service, technology and equipment possible. Our team includes an educator and technicians that hold diplomas of excellence in cosmetic and medical tattooing, level 4 laser and IPL technicians that have broad experience in anatomy and physiology who offer the most advanced techniques of laser hair removal and IPL treatments using Medical Grade Lynton Lasers machines. We are also proud holders of contracts with North & South Tees Hospitals, performing medical and cosmetic tattooing treatments.

Who we are

Medicare Cosmetics Ltd was set up by Emma Holmes, her aim being to offer treatments in a clinical, professional environment that provide exceptional results every time. Medicare Cosmetics operates from a clinic in Redcar in the North East. The Medicare Team consists of highly qualified and experienced technicians, nurses and medics who hold higher level qualifications in skin rejuvenation, Cryotherapy, HIFU and RF Microneedling to name a few. They have a wealth of knowledge and skills to carry out our extensive range of up to the minute aesthetic and rejuvenation treatments ensuring that Medicare has continuing excellent client care.

What we do

The services we provide have been picked especially to suit different cosmetic, rejuvenation and medical needs. Our procedures aim to enhance clients natural features, improve the quality of clients skin and also boost their confidence.

Book your FREE consultation today to receive bespoke advice from one of our technicians. Consultations are always in-depth and informative. It is important to us to provide clients with the knowledge to make an informed decision before going ahead with their treatment.

A TEAM YOU CAN TRUST

PEELS AND FACIALS

Here at Medicare Cosmetics we use a range of products by Mesooesthetic. They are the most advanced range of skin specific chemical peels. They achieve an accelerated skin regeneration in a controlled manner for visible, immediate and progressive results.

Glycolic Acid

- Anti ageing
- Unifies skin tone
- Reduces expression lines and superficial wrinkles
- Improves the appearance of lines and grooves in the skin
- Reduces the appearance of superficial acne scars
- Helps with skin flaccidity (sagging and drooping)
- Helps with alteration in colour of the skin

50% **£40** 70% **£100**

Lactic Acid

- Great for dull skins
- Reduces expression lines and very superficial wrinkles
- Suitable for around the eyes
- Softens the appearance of lines and grooves in the skin
- Anti ageing
- Improves rosacea and the dilation of blood vessels

40% **£35** 50% **£80**

Modified Jessner

- Brightens skin / uneven skin tone
- Reduces photo ageing
- Expression lines and superficial wrinkles
- Loss of firmness
- Dilated pores
- Dull, lacklustre skin
- Sun spots

- Helps with dry patches of skin caused by sun damage
- Helps with seborrhoeic dermatitis

20% **£35** 30% **£80**

BioRePeel

- Prevention of skin ageing and fine wrinkles
- Hyperpigmentation
- Skin texture improvement
- Acne
- Post acne injuries
- Large pores and blackheads.

£80

DECIDE WITH CONFIDENCE

ILLUMIFACIAL

illumiFacial is the 'next generation' of the highly successful 'Photofacial' treatment, using a new and unique combination of specialist Lynton skincare together with powerful, medical-grade Lynton IPL technology. This quick and simple facial treatment dramatically improves skin tone and appearance, helping your skin feel and look its best.

What does the illumiFacial® consist of?

1. Cleanse

The first step in achieving clear, healthy, radiant skin will involve a deep cleanse, with your illumiFacial practitioner using a specialist formulation to remove any impurities.

2. Tri-Fruit Acid Peel

Following a deep cleanse, a unique Tri-Fruit Acid Lynton Fruit Peel will be applied to your skin, for any- where between 3 - 10 minutes. This peel resurfaces skin texture and decongests pores, priming the skin ready for stage 3 of illumiFacial.

3. Lynton IPL

Post fruit peel, your skin will be at its optimum condition for the application of the award-winning Lynton Intense Pulsed Light (IPL) treatment. This works by both stimulating collagen and targeting any discolouration on your skin, e.g. freckles, pigmentation, vascular breakouts, general redness. In most cases, the results are instant, providing you with dramatically clearer, firmer skin.

4. Hydrate & Protect

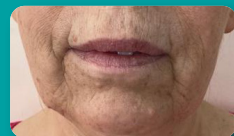

To help maximise the results your of your illumiFacial treatment, a trio of specialist serums will be applied to your skin post-IPL, helping soothe, regenerate and protect your skin.

Results from 1 illumiFacial treatment

How does it work?

You will learn how to exfoliate the skin safely. A superficial peel helps to dislodge the debris of dead skin cells on the surface of your skin allowing the light from the IPL to penetrate further and stimulates faster cell turnover. The IPL causes the skin to heat up and causes very mild, reversible thermal damage. The skin acts to repair this by increasing the rate of collagen and elastin production deep within the dermis. This increases our skin's elasticity and strength, making the skin look softer and smoother. You will also see a more uniform, flawless complexion as the treatment will also reduce broken capillaries, pigmentation, and sun damage.

BEFORE

AFTER

RESURFACE

Improve a variety of different skin concerns such as uneven skin texture, open pores, scars, wrinkles, and skin laxity. This treatment is also suitable for stretch marks.

How does the Resurface Fractional Laser treatment work?

Minute sections of the skin are targeted with laser light, which penetrates the tissue. This causes small columns of thermal damage which, in turn, stimulates significant collagen renewal. The surrounding non-affected areas of skin aid the body's natural recovery process, allowing dramatic results without significant downtime.

REBRIGHT & SUPER HAIR REMOVAL TREATMENTS

Hair Removal

Laser hair removal offers a long-term solution to unwanted or excess hair for both men and women and is suitable for most areas of the face and body. A course of approximately 6-8 treatments are recommended for the best hair reduction result.

Rebright

585nm intense pulsed light technology is widely used by dermatologists for a range of concerns; from pigmented lesions to red veins, redness and sun spots. Discolouration and sun damage can be a key sign of ageing, erasing these signs to achieve a flawless airbrushed appearance can dramatically reduce the impression of ageing skin. Price for these treatments can be given at your free consultation as the cost depends on the size of the treatment area.

Acne (Rebright)

Acne can be effectively treated with Rebright (IPL) alone or in combination with other clinical treatments. IPL treatments greatly reduce the number and severity of active lesions, lessening the inflammation and frequency of breakouts.

Pigmentation (Rebright)

Pigmentation can occur for a number of reasons and can include freckles, age spots and sun damaged skin. Some can be a natural occurrence as we age. From the age of 40 the skin is less able to regenerate from sun exposure and age spots begin to appear as a result. Pigmented lesions such as sunspots and freckles can be successfully removed with Rebright treatments creating a more flawless, youthful and glowing appearance.

Skin Rejuvenation (Rebright)

Treatments can include collagen stimulation, wrinkle improvement and skin tone improvement. Skin rejuvenation treatments offer a solution for all the visible signs of ageing caused by sun damage, such as brown spots, redness, uneven skin texture, lines and wrinkles.

Vascular Treatments (Rebright)

These include rosacea, thread veins, flushed skin and leg veins. Depending on the lesions, leg vessels can also respond well to treatment.

SUITABLE FOR MEN AND WOMEN

SEMI PERMANENT MAKE-UP & MICROBLADING

Semi permanent or 'permanent' make-up is a micropigmentation treatment performed using organic pigments. These treatments all fade over time and will require six month/yearly enhancing.

Eyebrows

Eyebrow tattooing is becoming increasingly popular amongst women and men of all ages. Eyebrows are known for framing and lifting the face, giving a more youthful appearance. Eyebrow styles vary depending on the client's individual face shape, skin tone, age and hair colour. All eyebrows tattooed are bespoke to each client.

Eyeliner/Eyelash Enhancement

Eyeliner is commonly known for smudging and fading, achieving a perfectly crisp line every time can be challenging. Our eyeliner treatments can provide these results for you with minimum effort required in the mornings! Eyeliner tattooing defines, perfectly shapes the eyes and helps to thicken the appearance of the lashes. Alternative to eyeliner, eyelash enhancement is through the lashes, creating a more natural appearance. We have a wide range of colours to suit everyone and compliment an individual's eye colour.

Lip Liner and 'Blush'

Lip liner and blush adds definition, a burst of colour and a plumper appearance to your lips - this is a great alternative to dermal fillers. Lip liner and blush creates a crisp, defined lip line. As we age, our lips become thinner and lose their natural colour - this treatment restores the youthful look back to your lips. We have a wide range of colours that you will be able to select from with your technician on the day of your treatment.

Semi Permanent Make-up Removal/Correction

Only too often have we been asked to correct someone else's work. Semi permanent make up removal can usually be achieved using medical dry needling using salt and saline - which is a non-laser technique commonly used to lighten and remove SPMU

You will be required to have a free consultation prior to any treatment undertaken, so that we can advise what option would be most effective for you. Sometimes only a partial removal is needed.

Beauty Spots

Beauty spot tattooing is a great way to save yourself pencilling and worrying about smudging with the correct placement. This unique treatment is one which can enhance an area of your face.

We are not able to tattoo over moles, your technician can give you advice on placement and size on the day of your treatment.

Scalp Tattooing or Camouflage

This treatment is ideal for men and women who suffer from different types of hair loss or areas of the scalp that can no longer produce hair. This lasts 3 to 5 years.

This treatment involves tattooing the scalp (to create a shaven hair look), the hairline, or particular areas of the scalp to disguise thinning hair or hair loss to create a denser appearance to the hair. This treatment can also be used to treat scarred areas of the scalp. Finance Payment options available.

AESTHETIC TREATMENTS

We offer a wide range of aesthetics treatments. Over time our faces age and everyday movements leave their mark.

Our skin also loses its contour and plumpness. All treatments will be carried out by our fully qualified aesthetic practitioner.

Line Relaxing Treatments - From £130

This is a prescription only non-surgical treatment and will only be carried out following a full consultation. Botulinum toxin is a protein which works on the activity of muscles. This reduces muscle activity softening static lines and can prevent any further lines forming. Results are temporary and skin will return to its prior state once the effects have worn off.

Skin Boosters - From £100

Skin boosters are injectable treatments that hydrate and improve skin texture, elasticity, and overall radiance from within. Areas that can be treated are face, neck, hands, décolletage (cleavage) and arms.

Thread/Cog Lift - From £180

A non-surgical thread lift. This treatment restores the volume of fullness to the face. It works by reducing or eliminating lines, wrinkles, folds in the skin and tightens the skin.

Rhinoplasty - £120

Injecting dermal filler under the skin to change the structure of the nose. Perfect for those who want to smooth out bumps or make it less angular.

Dermal Fillers

The dermal fillers used are made from hyaluronic acid. The fillers are used to contour the face and restore lost volume which also hydrates the skin.

Lip Fillers

Used to define the lip line (border) of the lip and restore / create volume in the lip.

Nasal Labia

The lines or deep creases from the nose to the corners of the mouth.

Marionette Lines

The lines from the corner of the mouth to the bottom of the chin.

Peri Oral (smokers lines)

To plump out fine lines across the top of the mouth, caused by smoking/ageing.

Chin

Deep creases and even dimples can develop on our chin over time. Filler can be used to bring back fullness in these areas.

Cheeks

Dermal fillers to the cheeks can restore lost volume that depletes with age and contour the face.

Jaw Line

Filler can define the jaw line and eliminate jowls.

We have a range of different fillers that we can use.

From £100

REMODEL

Remodel Radiofrequency treatments will help to lift and tighten your skin.

You will see a softening of fine lines as well as lifting in the cheeks and a tightening of the jawline. This treatment is suitable for the eye area too.

Energy is applied to the skin in an act of gentle heating. This stimulates a process often referred to as wound healing. The heat is recognised by the brain which then signals cells in the deeper layers of your skin to produce collagen and elastin. Over time, the collagen and elastin will grow and your skin will start to tighten, looking fresher and smoother.

CRYOPEN

CryoPen is an advanced cryotherapy innovation that is a fast, effective, safe and new solution for removing skin imperfections. CryoPen offers the ideal treatment for removal of:

- Skin tags
- Sun / Age spots
- Millia
- Warts
- Cherry Angioma (Blood Moles)
- Viral Verrucae

BEFORE

AFTER

Price - £40 per cartridge

DERMX LUXURY DERMAPLANING

Dermaplaning is the controlled scraping of the skin using a surgical blade. The purpose of this treatment is to remove dead skin cells and fine hair. This treatment is a highly effective exfoliation as it 'shaves' the outer layer of dead skin whilst removing 'fluffy' hair.

Benefits

- Exfoliating
- Removes outer layer of dead skin
- Removes fine and fluffy hair
- Hair does not grow back darker or thicker
- Reduces the appearance of fine lines and acne scars
- Any skincare applied will be absorbed completely due to the removal of dead skin and hair

£40 per treatment

HELPING SKIN IMPERFECTIONS

PRESSOTHERAPY

Pressotherapy is a relaxing, non-invasive treatment that uses gentle air pressure to stimulate the lymphatic system, reduce fluid retention, and improve circulation. Often described as a “mechanical lymphatic drainage massage,” it’s ideal for supporting detoxification, easing heavy or swollen legs, and enhancing the effects of other body treatments.

Benefits of this treatment:

- Reduces bloating and water retention
- Improves circulation and lymphatic flow
- Supports detox and immune function
- Relieves tired, heavy legs
- Helps reduce the appearance of cellulite
- Enhances recovery after exercise or aesthetic treatments

Perfect for clients looking to feel lighter, more energised, and refreshed from the inside out.

£40 per session

BODY LIPOLYSIS

Body Lipolysis targets smaller deposits of fat on specific parts of the body. You may be a good candidate if you have fatty tissue on your abdomen, hips, thighs, or buttocks that you wish to get rid of.

It is intended for the reduction of localised fat areas or deposits and is an alternative to invasive fat removal surgeries. We estimate up to 1cm of the fat layer in the localised area is lost per treatment. We cannot guarantee your specific results as this is based on the specific client. The fat breakdown will continue for 3-4 weeks after treatment.

Price on consultation.

MESOTHERAPY

Mesotherapy is a highly effective skin rejuvenating treatment that delivers nourishing substances including vitamins, amino-acids and minerals to the layers of the skin where cell repair and growth occurs. It is a safe, natural alternative to invasive cosmetic procedures and is ideal for overall anti-aging, reducing the appearance of fine lines and wrinkles, helping with elasticity and skin tightening and improving hydration levels in your skin, making a positive impact on your skin at the core.

Mesotherapy can be applied to the whole face, neck, chest or hands, leaving skin immediately feeling healthier and radiant. The Mesolift process involves a series of extremely superficial micro needling injections to the epidermis which allows for transportation of the products to the dermal layer where cellular interaction takes place. The substances and products we use are delivered by the Medical grade Pistor Eliance Mesotherapy Gun, which offers the most comprehensive injection menu settings available in the present market.

Using this amazing piece of equipment we deliver vitamins, minerals and amino acids that decrease as we age, making this the ultimate skin rejuvenation treatment.

Benefits of this treatment:

- Fine lines and wrinkles
- Improves skin hydration both at surface and in deep layers
- Anti-aging
- Elasticity and skin tightening
- Brightens skin tone
- Long lasting moisturising effect
- Optimising results
- To achieve beautiful radiant skin and client skin goals
- To provide specific solutions for individual problems
- Leave with your skin feeling healthier

Mesotherapy for Hair Loss

This is a natural alternative to invasive cosmetic procedures and is ideal for clients with alopecia multi factorial, for thicker and fuller hair after weakness or stress, hair loss through thyroid problems, hormonal hair loss and none pathological hair loss. The products we use increase the anagen phase and reduces the telogen phase of the hair growth and loss cycle as well as promoting new hair growth.

Mesotherapy for Face

Mesotherapy replaces these naturally occurring vitamins and nutrients resulting the skin luminescent, hydrates, nourished and firmer with an improved texture. The product line we used is designed to provide deep and long-lasting results.

Mesotherapy for Pigmentation

Mesotherapy products have pigmentation diminishing properties that also help to lighten and whiten the skin, treating liver spots, age spots, pigmentation through sun damage, pigmentation caused through acne-scarring and much more.

Mesotherapy for Firming

The Mesotherapy for Firming treatment has long lasting firming and moisturising properties and it is especially recommended for revitalisation sessions, while acting as a ‘filler’ for superficial wrinkles.

BEFORE

AFTER

MEDICAL TATTOOING

Medical Tattooing is a progressive form of permanent cosmetics. This technique, once mastered, can be used to treat patients for different kinds of medical conditions by using an implantation technique to imbed pigments into the dermal layer of the skin.

Colours for these particular treatments are chosen carefully and are bespoke to each and every client.

A free consultation is required before booking any medical tattooing treatment so we can assess your suitability, discuss your goals, and ensure the treatment can achieve your desired outcome.

Skin Camouflage

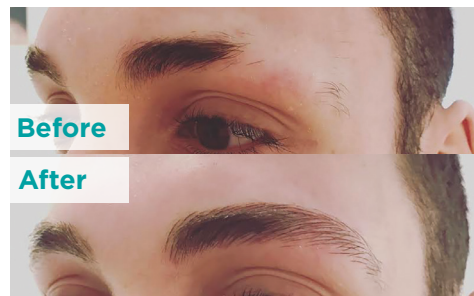

Skin Camouflage is one of the many medical techniques that benefits patients who have skin disorders like Vitiligo or others who may have de-pigmentation of the skin due to an accident, stretch marks or scars that have healed leaving a de pigmentation mark. Skin camouflage does not remove the imperfections, however it improves the aesthetic appearance of such imperfections, leaving patients and clients alike, feeling confident and a little more like themselves again.

Prices from £80

Eyelash/Eyebrow Enhancement

Along with scalp micro-pigmentation, eyelash/eyebrow tattooing is a treatment that creates the illusion of eyelashes/eyebrows. After suffering with hair loss, many people feel as though this is an essential procedure, to help open up and re define their eyes. Suffering hair loss in such a visible area can be extremely unsettling for many people, this procedure allows them to rehabilitate their appearance and feel positive again.

From £135

Hair Loss/Scalp Tattooing

Clients who have suffered with hair loss due to certain illnesses, medication or alopecia can benefit from scalp camouflage or scalp micro-pigmentation. Scalp Camouflage is the plantation of medical grade hypoallergenic pigment in to the scalp which can then either be blended in to existing hair to give an illusion of thicker or denser hair or used to create a shaven hair look where there was previously little or no hair at all. This treatment can be important to men and women, helping restore their confidence after suffering with hair loss.

£130 per hour

Deliberate Self Harm (DSH) Scars

Scarring from self harming is something that people feel self conscious about and constantly worry about covering up. We offer treatments which can help soften the scarring and therefore make them less visible. A course of treatments will be recommended to every client depending on the scarring and the area of scarring.

From £60

Scar Camouflage

Can be used to camouflage scars on the face and body to make the scars appear similar to a client's skin tone.

Prices from £80

Syndactyly 'Webbed' Fingers or Toes

We can help disguise 'webbed' fingers or toes by tattooing the area to create the illusion of a 'gap' in between. Using carefully selected pigments and colours, a shadowed look can be created.

From £60 OR £100 per hand/foot

Cleft Lip Rebalancing

Cleft lip and palate are very common conditions. Around one in every 600 to 700 babies in the UK are born with one of these conditions, or with a combination of both. Cleft reconstruction is performed on a daily basis in Britain and achieve fabulous results.

Corrective surgery to the cleft lip or palates can be hugely rewarding and successful. However, scarring is inevitable and is usually always visible right into adulthood. Medicare Cosmetics have procedures that can minimise the visual appearance of these scars.

From £400

Medical Dry Needling

Multi-trepanic Collagen Actuation (MCA) is a non-surgical and natural way of softening the scars following cleft reconstruction. The treatment involves dry needling that relaxes the area making scar tissue more flexible. The skin can be softened and made more elasticated. An anaesthetic solution is used during this procedure.

MCA works by stimulating the epidermis layer of skin. The dry needling causes inflammation and swelling to the area treated. Fibroblasts produce collagen and elastin begins the healing process causing re-pigmentation to occur.

From £60 per treatment

Areola Tattooing

Areola tattooing; commonly referred to as nipple tattooing, is a micropigmentation procedure which can be used for medical or cosmetic purposes. The aim of this procedure is to improve the cosmetic appearance of the breast by creating as closely as possible a nipple/areola colour that matches the existing nipple (if applicable).

Reconstructive breast tattooing (re-pigmenting) the areola gives a natural appearance to the breast, many clients are referred to us via a scheme we have with the NHS. However, we welcome clients who may wish to have this procedure privately, perhaps after having breast augmentation/uplift surgery or for cosmetic reasons. We can also treat men who have had breast surgery.

Bilateral £200 Single £100 Per treatment

Our practice works alongside James Cook University Hospital in Middlesbrough on a referrals basis. However, clients can make appointments privately.

RENEWING CONFIDENCE

REJUVENATE YOUR SKIN

FOCUS DUAL

Our Focus Dual machine offers unrivalled results for non-surgical skin tightening. It includes a unique combination of two of the latest clinically proven technologies for non-surgical skin lifting, firming and tightening of the face and body. Radiofrequency Microneedling and High Intensity Focused Ultrasound (HIFU).

This machine is Medical CE certified, safe, and offers gold standard results without any downtime and is virtually pain free. We have a range of special cartridges available for use during our HIFU treatments. They each are able to target different layers of skin in order to stimulate collagen and elastin. What makes this machine and its cartridges so special is that we are able to reach the SMAS layer which is the layer that only surgeons have been able to work on during surgery - until now!

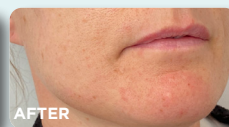

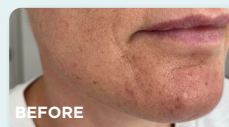

Radio Frequency Microneedling

Utilising microneedles to puncture the skin's surface can help to improve a variety of different indications such as scars and wrinkles and helps to improve the overall appearance and rejuvenation of skin. Radiofrequency (RF) induces thermal trauma to stimulate neocollagenesis in deep layers of the skin, creating stronger, firmer skin to help with concerns such as wrinkles and laxity. Combine Radiofrequency & Microneedling (RFM) together and you have a dual effect on the tissue for a whole host of textural and ageing concerns such as acne scars, skin laxity, stretch marks, open pores, and wrinkles

Radiofrequency Microneedling targeted treatments:

- Eyebrow lifts for loose skin
- Smooth acne and surgical scars
- Tighten lax skin on the face, neck, chest, hands, and body
- Shrink large pores and improve uneven skin tone and texture
- Smooth fine lines and wrinkles
- Reduce stretch marks

Price on Consultation

High Intensity Focused Ultrasound (HIFU)

HIFU creates deep focus points of coagulative necrosis in the deeper layers of skin to tighten and lift them through heat.

As the skin's natural wound healing response is triggered, the skin naturally lifts and tightens over time, continually improving up to 12 weeks post treatment.

HIFU can reduce lines and wrinkles, crepiness, and laxity. This is amazing for lifting and tightening jawlines, make cheekbones more prominent, reduce under eye bags, and lift brow areas.

HIFU targeted treatment

- Eyebrow lift and eye lift
- Mid-face skin tightening and lifting
- Jawline submental sculpting
- Smooth fine lines and wrinkles around the mouth
- Sculpt the body and reduce stubborn pockets of fat
- Tighten lax and loose skin on the body

Price on Consultation

SKIN BOOSTERS

Skin boosters are advanced injectable treatments designed to deeply hydrate, rejuvenate, and improve overall skin quality from within. Unlike dermal fillers, they don't add volume — instead, they work by stimulating collagen, elastin, and cellular renewal for a smoother, firmer, and more radiant complexion.

At our clinic, we offer a range of targeted skin boosters including Polynucleotides, Profhilo, Seventy Hyal, Exosomes, and Syniro — each selected to treat specific skin concerns such as fine lines, dullness, dehydration, and early signs of ageing. Prices are per treatment.

Profhilo - £180

A skin-rejuvenating injectable made from pure hyaluronic acid that spreads beneath the skin to deeply hydrate and stimulate collagen and elastin. Ideal for clients noticing crepey skin, dullness, or a loss of firmness — especially on the face, neck, or hands. Results are natural, subtle, and glowing..

Best for:

- Dull, dehydrated skin
- Skin laxity and fine lines
- Overall skin glow and hydration

Polynucleotides - £100

A regenerative treatment derived from purified DNA fragments that encourage cell repair, reduce inflammation, and improve skin texture and tone. Especially effective for under-eyes, pigmentation, acne scarring, and sensitive or damaged skin.

Best for:

- Skin healing and repair
- Under-eye rejuvenation
- Acne scars, redness or inflammation

Syniro - £100

An advanced, multi-action injectable combining polynucleotides and hyaluronic acid to hydrate, firm, and support cellular regeneration. Offers both instant hydration and long-term structural improvement to the skin.

Best for:

- Ageing or thinning skin
- Dehydration + skin repair
- Clients seeking both glow and anti-ageing support

Exosomes - £100

A cutting-edge treatment using stem-cell-derived particles (exosomes) to boost skin regeneration at a cellular level. Known for improving skin tone, texture, fine lines, and even supporting hair growth when used on the scalp.

Best for:

- Advanced anti-ageing
- Dull, tired, or uneven skin
- Post-treatment healing and recovery support

Seventy Hyal - £100

A next-generation skin booster designed to improve skin hydration and elasticity. With a high concentration of hyaluronic acid, it restores skin smoothness and helps reduce the appearance of fine lines.

Best for:

- Younger clients or first-time skin booster users
- Hydration and glow
- Preventative anti-ageing

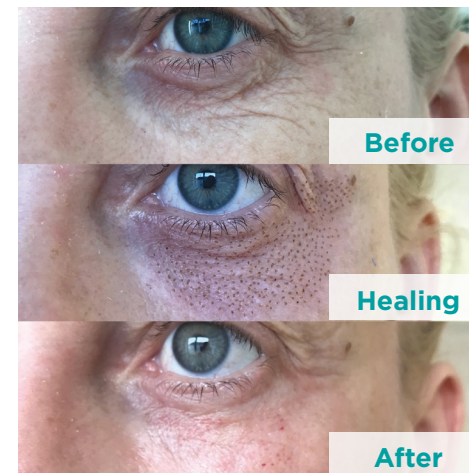

FIBROBLAST

Fibroblast is a skin lifting and tightening procedure which is non-surgical and non-invasive and performed using a handpiece.

An electrical arc is transmitted through a small probe; the probe does not touch the skin. The arc causes superficial damage to the upper dermal layer of the skin and transmits heat to the lower levels of the skin. This causes the new skin to generate collagen and elastin fibres which we can lose as we age.

This treatment is extremely successful and renowned for the improvement on the eye area, specifically upper and lower lids and crows feet. The excellence of the Fibroblast is not limited to the eye area - the neck, jawline, upper and lower lip, mouth area, jowls and forehead can all be tightened and lifted with this treatment.

Upper eyelids	£200
Lower eyes	£200
Stomach/stretch marks	POC
Crows feet	£150

RESTORE YOUR YOUTH

SKINCARE RANGE - MEDIK8

Medik8 is a professional strength skincare range that is suitable for everyone, with proven successful results. These products are high in potency, clinically backed up and all manufactured in the UK. The range includes moisturisers, gels, post treatment recovery care, cleansers and sunscreens. Some of the products are particularly helpful for acne breakouts, pigmentation, sensitive skin and anti-ageing factors.

Please get in touch for further information or prices.

NAD+ INJECTIONS

NAD+ (Nicotinamide Adenine Dinucleotide) is a vital coenzyme found in every cell of the body, playing a key role in energy production, cellular repair, and brain function. As we age or experience stress, our natural NAD+ levels decline — often leading to fatigue, brain fog, and reduced overall performance.

NAD+ injections help restore these levels, supporting physical and mental wellbeing from the inside out.

Benefits may include:

- Increased energy and reduced fatigue
- Improved mental clarity and focus
- Enhanced mood and reduced brain fog
- Better cellular repair and anti-ageing support
- Improved metabolism and detoxification
- Faster recovery from stress or burnout

Ideal for anyone seeking to optimise their wellness, boost energy naturally, or support long-term cellular health. **£60 per treatment**

TATTOO REMOVAL

Our advanced laser tattoo removal treatment safely and effectively breaks down unwanted tattoo ink using targeted light energy. Over a series of sessions, the body naturally eliminates the ink particles, gradually fading the tattoo with minimal discomfort and no damage to the surrounding skin. We offer removal for both body tattoos and semi-permanent eyebrow tattoos, using equipment suitable for most skin types.

A free consultation or clear photo of the tattoo is required before booking so we can assess the area and provide an accurate price per session. Treatments must be spaced at least 6 weeks apart to allow the skin to properly heal and the body to process the ink.

Please note: While significant fading is expected, full removal cannot be guaranteed, particularly for coloured inks such as green, blue, or yellow, which may be more resistant to treatment.

SENSITIVITY TESTING

John Neal has been providing allergy testing since 1997 and has test people of all ages at several locations throughout the north east of England, with a non-invasive test. The test does not take blood, scratch the skin surface, or inject anything into your system.

John uses a machine which tests the body's resistance to foods whilst checking the vitamins and minerals shortages, and food sensitivities in the body. The system works on the theory of utilising the acupuncture pressure points on the fingers to measure resistance in the body to substances (foods, airborne, drinks etc) which can be the root cause of problems in everyday life.

Test	Including
Food Test - £25	126 items including 18 e-numbers. Includes coffee, dairy, fish, fruit, grain, herbs, meat, spice, sugar, tea, vegetables
Airborne Allergens - £10	27 items including bacteria, dust, hair, mould & pollen
